

Fresh, Clean, and Sustainable Greens.

At H2O Farms, we grow hydroponic lettuce and mixed greens right here in New England. Our whole-headed lettuce and custom mixes are grown in clean, controlled environments, ensuring that our greens are fresher, tastier, and crispier. We're proud to provide produce that has a longer shelf life, which means less waste and more satisfaction. Our Food Service packaging is designed with chefs and cafeterias in mind, offering a unique and practical solution for bulk use. Taste the difference with H2O Farms. **Your source for premium, local greens!**
